

ABOUT SHANNON PINEAU

My roots are in Ontario in a beautiful town called Temagami. We moved to Red Deer, Alberta in 1977 with the lure of the oil boom and soon fell in love with the thriving city.

In 1996 I graduated from the University of Alberta with my BScN. My nursing career took me to Hinton, Alberta where I worked in a rural hospital setting and also met my future husband. We both moved to Calgary in 1999 where I worked on a Neurosurgical unit at the Foothills hospital. I then became a Nursing Instructor for the Neurosciences department until 2006.

My passion has always been finances and investing and in the early 2000's I started taking numerous courses on investment real estate and the stock market. I purchased both residential and commercial rental properties during this time frame and wrote a book for beginners on how to buy and manage your first rental property.

In 2006 we moved back to my hometown of Red Deer and I started working as an Investment Consultant, raising money for a private real estate investment company in the Exempt Market. I completed my Canadian Securities Course in 2009 and continued to take other personal finance courses.

Following the recession in 2009, I have dedicated myself to educating investors about the Exempt Market in Alberta. My motto is "Learn before You Earn" and my goal is to give investors as much information as possible to make informed decisions about investing in Exempt Market products.

The quality of Exempt Market products can vary. Finding the best of them and performing due diligence is something that most Canadians need an Investment Advisor in order to do. I will be pleased to help you with this.
